

# CROSS BASE PLATE

---

The Cross Base Plate is specially designed for standing seam roofs or metal plate roofs with varying distances. The Cross Base Plate can pivot therefore it can be adjusted to the right distance and secured with clamps.

# CROSS BASE PLATE

## Cleaning & maintenance

Products do not require any special maintenance, aside from cleaning. Cleaning of your SDA product is important to prolong its lifetime. Use cold water and soap to eliminate all type of residue (dirt, chemicals, etc.). Dry gently out of sunlight. After use, place your product in a well-ventilated area and avoid excessive heat. Proper care prevents premature wear of the equipment.

## Inspection

Look for damage, deterioration or malfunction before and after every use. Inspections should only be made by trained and authorized personnel. Every inspection should be registered in the product dossier.
