

SQUARE BASE PLATE 400

The Square Base Plate 400 for metal profile roof panels and standing seam roofs is designed for installation and attachment on the roof surface, in this way the integrity of the roof is protected. The Square Base Plate 400 can be fixed with clamps on standing seam roofs or with rivets on metal roof panels.

SQUARE BASE PLATE 400

Cleaning & maintenance

Products do not require any special maintenance, aside from cleaning. Cleaning of your SDA product is important to prolong its lifetime. Use cold water and soap to eliminate all type of residue (dirt, chemicals, etc.). Dry gently out of sunlight. After use, place your product in a well-ventilated area and avoid excessive heat. Proper care prevents premature wear of the equipment.

Inspection

Look for damage, deterioration or malfunction before and after every use. Inspections should only be made by trained and authorized personnel. Every inspection should be registered in the product dossier.
