

TEMPORARY HORIZONTAL CABLE LIFELINE 2 USERS

The temporary horizontal cable lifeline can be adjusted from 6.5 to 65.6 ft (2 to 22.5 m) and keeps the user insured during their displacements. It can be tied to an anchorage connector. The ratchet is used to give tension to the line after setting the required distance. Suitable for the use of 2 persons.

TEMPORARY HORIZONTAL CABLE LIFELINE 2 USERS

Cleaning & maintenance

Products do not require any special maintenance, aside from cleaning. Cleaning of your SDA product is important to prolong its lifetime. Use a damp cloth if necessary.

Inspection

Look for damage, deterioration or malfunction before and after every use. Inspections should only be made by trained and authorized personnel. Every inspection should be registered in the product dossier.
