

D ANCHOR

The D Anchor SS is built with a high-quality material that guarantees strength and durability even in the toughest environments. This anchor point provides a secure attachment for a complete set of personal fall protection equipment and is therefore suitable for use in combination with lanyards, SRLs & vertical / horizontal temporary lifelines.

Cleaning & maintenance

Products do not require any special maintenance, aside from cleaning. Cleaning of your SDA product is important to prolong its lifetime. Use cold water and soap to eliminate all type of residue (dirt, chemicals, etc.). Dry gently out of sunlight. After use, place your product in a well-ventilated area and avoid excessive heat. Proper care prevents premature wear of the equipment.

Inspection

Look for damage, deterioration or malfunction before and after every use. Inspections should only be made by trained and authorized personnel. Every inspection should be registered in the product dossier.
